Summary

Senior software/data platform engineer with Python + AWS experience building production systems in regulated environments, plus prior insurance-domain experience at John Hancock. Strong in backend service reliability, compliance controls, and day-to-day AI-assisted engineering with human-in-the-loop validation.

Experience

SimpliSafe — Boston, MA

Senior ML Ops Engineer

Hired at Level II · Oct 2024 – Mar 2026 · Promoted to Senior in Jun 2025

- Built and operated production Python/AWS services for ingestion, permission routing, and Right-to-be-Forgotten compliance
- Designed version-controlled sampling that reduced ingest volume 75% (1.2M → 300k videos/day)
- Led daily reconciliation checks and remediation for a legal-risk toggle incident affecting hundreds of thousands of users
- Led a 4-month handoff of the video-ingestion service to 3 ML engineers (CI/CD, CloudFormation, dashboards, datalake tables, sampling ops)

Data Engineer / Platform Engineer

Nov 2021 – Oct 2024 · Promoted to Data Engineer II in Jun 2023

- Migrated cron-based workflows to Dagster + YAML DSL adopted by 30+ users across 10 teams
- Built ~50 Zuora pipelines across ~25 objects for subscription/finance reporting (ZOQL + AQuA)
- Migrated GitHub Actions runners from EC2 to EKS (CDK + Helm), reducing test delays from >1 hour to ~20 minutes

John Hancock Life Insurance — Boston, MA

Actuarial Associate

May 2019 – Nov 2021

- Built annuity valuation tooling with reserving/regulatory stakeholders, including Python AST conversion of model specs to Excel
- Automated ~5 quarterly reporting workbooks with VBA, reducing recurring effort by ~10 hours/quarter
- Prepared quarterly capital and remittance forecasts for senior management

Education

Temple University — Philadelphia, PA

B.A. in Actuarial Science, Minor in Computer Science · *Summa Cum Laude*

Aug 2015 – May 2019

Certifications

- CKA (2023) · AWS Cloud Practitioner (2022) · ASA (2021, 8 exams)

Technical Skills

Languages: Python, SQL, Bash, Go

Cloud/Infra: AWS (Lambda, S3, DynamoDB, Kinesis, EventBridge, SQS, EC2, EKS, CloudFormation, CDK, SAM, MWAA), Kubernetes, Docker, Helm, GitHub Actions

Data/Orchestration: Dagster, Iceberg, Ray/Anyscale, Kafka, Step Functions, DuckDB, Hex
